PASINDU LAKMAL

FULL STACK ENGINEER | TECH ENTHUSIAST

PROFILE

I am a passionate and dedicated Full Stack Engineer with a strong foundation in computer science principles and hands-on experience in coding, debugging, and developing software solutions. With proficiency in languages such as Java, Python, and JavaScript, I am adept at problem-solving and eager to contribute to innovative projects. My academic background, combined with internships and personal projects, has equipped me with a solid understanding of software development life cycles, version control systems, and collaborative tools.

WORK EXPERIENCE

Echonlabs(PVT)Ltd

2024

Trainee Software Engineer

- Gained hands-on experience in Agile environment to develop enterprise software applications according to business requirements.
- Learnt and improved technical skills about AngularJS, NestJS and MongoDB.

PROJECTS

Agent Virtual Office Revamp

AVO - Agent Virtual Office is the unique cloud-based all-in-one business platform for enterprise leads, targets, and performance monitoring of agents and achievements as well as the management of all the end-to-end processes of daily operations to deliver value to customers. By using this system, clients have the opportunity to automate the agent management, the leads management and the new business management. I worked in this project during internship period and got experience in technologies **Angular, Nodejs, MongoDB, NestJs, RxJs, Jest, JWT, Docker, Puppeteer.**

EL BaseNeo Application

This is the base application of the company which I worked as a Trainee Software Engineer. This consists with e-document management system and Identity access management system. I also worked in this project and gained experience in **Angular, Nodejs, MongoDB, NestJs, RxJs, Jest**

amazona(E-Commerce WebApplication)

This is an E-Commerce web site which was developed by using **ReactJS, NodeJS, ExpressJS, MongoDb.** I implemented a payment gateway(paypal) and I wish to add analytics using graphs.

POS System backend project

This is an ongoing backend project with **SpringBoot** and **MySQL.** I already used postman and swagger UI for testing. As well as I wish to create a frontend for this POS System using **ReactJS.**

Employee Management System

This is a full-stack project which was developed by using **ReactJS, SpringBoot** and **MySQL.**

Portfolio Website

This portfolio website was developed using **AngularJS** with **ngx bootstrap.** As well as I used angular material UI's.
